

# Project Features List:

Design framework: Bootstrap

1. Registration
  - a. Name and Lastname
    - i. Allows the user to set their preferred name. This is for user recognition.
  - b. Email
    - i. Allows the user to set their preferred email address.
  - c. Password
    - i. Allows the user to set a password of their choice.
  - d. Food Allergies
    - i. Allows the user to put in what allergies they have.
  - e. Select Profile photo from presents
    - i. Allows the user to pick out a picture from already existing choices. **Registration leads the user to *Homepage (index)*, *Food Allergies* and *Profile Pictures*.**
2. Homepage (index)
  - a. Allows the user to access the different parts of our website: Grocery List, Recipe List, Search recipe Database, Manually add Recipe, Profile, Help Tab
  - b. **Homepage (index) leads the user to *Grocery List*, *Help Tab*, *Recipe List*, *Search Recipe Database*, *Manually Add Recipes*, and *Profile*.**
3. Grocery List
  - a. Sorts the food into different categories for ease of finding around the store b. Functionalities:
    - i. You will be able to rearrange the categories to match your specific store
    - ii. You will be able to remove items from the list
    - iii. You can also check off items as you pick them off the shelf
4. Recipe List
  - a. A list of previous URLs to find your saved recipes and before adding a new one we will check if the recipe has already been added to the list
  - b. Functionalities:
    - i. Remove Recipes
    - ii. Add new recipes
5. Search Recipe Database
  - a. Includes a list of recipes submitted by users.
  - b. Complies with Food Allergies so it will not show you recipes if they contain food allergies.
6. Manually Add Recipe(or items to grocery list)

- a. This will allow the user to add ingredients to the grocery list where they put in the name of the item and the quantity

## 7. Profile

- a. Users can change name and last name as well as their email address.
- b. Users can also change Profile Photo, food allergies, and password.

## 8. Profile Picture

- a. Users can view a range of profile photos presets to be selected from.

## 9. Help Tab

- a. FAQ
- b. Website walk through
- c. Contact Support

## 10. Food Allergies

- a. A list of selectable allergies for users to pick from. They can pick multiple and as many as they wish.

## 11. FAQ

- a. Insert frequently asked questions about the website

## 12. Website Walkthrough

- a. Users can see step by step instructions on how to insert recipes.
- b. A step by step instruction for removing recipes.
- c. Step by Step instructions for other features of the website.

## 13. Contact Support

- a. Allows the user to contact the admin team to help them with technical issues

## 14. Log-in

- a. Area for the user to enter email address, password and an option for forgotten password which will lead them to a verification page.
- b. Verification Step for Changing Password
- c. Register changes to the password
- d. After a successful change of a password it sends the user back to the login page

# Project Requirements:

We will be using an Agile development method in order to complete our project.  
(A scale of 1-5 in order to determine the criticality of each story. 1 being of low critical importance while 5 being the utmost importance.)

## User Stories

1. Registration
  - a. As a user, I want to be able to register an account using my personal information such as my name, email, personal password, etc. The reason I want to do this is because if I were to create a list using the website I want to be able to leave and come back and the list is still there. I want my information to be readily available every time I login.
  - b. (Weight = 5) This feature is completely necessary for the website to function properly.
2. Homepage
  - a. As a user, I want at least one functioning homepage in order to browse everything the website has to offer. I want the homepage to serve as a homebase for me to always return to. I should be able to navigate to everything on the website here. Such as my own list, find a recipe page, search for whatever, profile page, etc.
  - b. (Weight = 5) This feature is necessary in order for the website to function as intended. But this story/feature depends more on how intuitive we can make the homepage and accessible.
3. Grocery List
  - a. As the user, I want to be able to add individual food items and have them placed into their respective categories such as adding cheese and having it stored into a dairy category within my list. I also want to be able to edit my list. For example if I decide if I don't want an item anymore I should easily be able to delete it from my list. Or if I am buying my items at the grocery store I should be able to check items off the list.
  - b. (Weight = 5) Completely necessary to function properly.
4. Recipe List
  - a. As the user, I want to add and remove specific recipes in order to come to them later or access all the recipes that I have stored. Example, if I find a recipe that I like, say a pizza recipe, I should be able to store this pizza recipe in a list and be able to come back to a page containing this specific recipe.
  - b. (Weight = 4) I would also like to search a recipe database in the event I want to just look around for a recipe

5. Profile Page

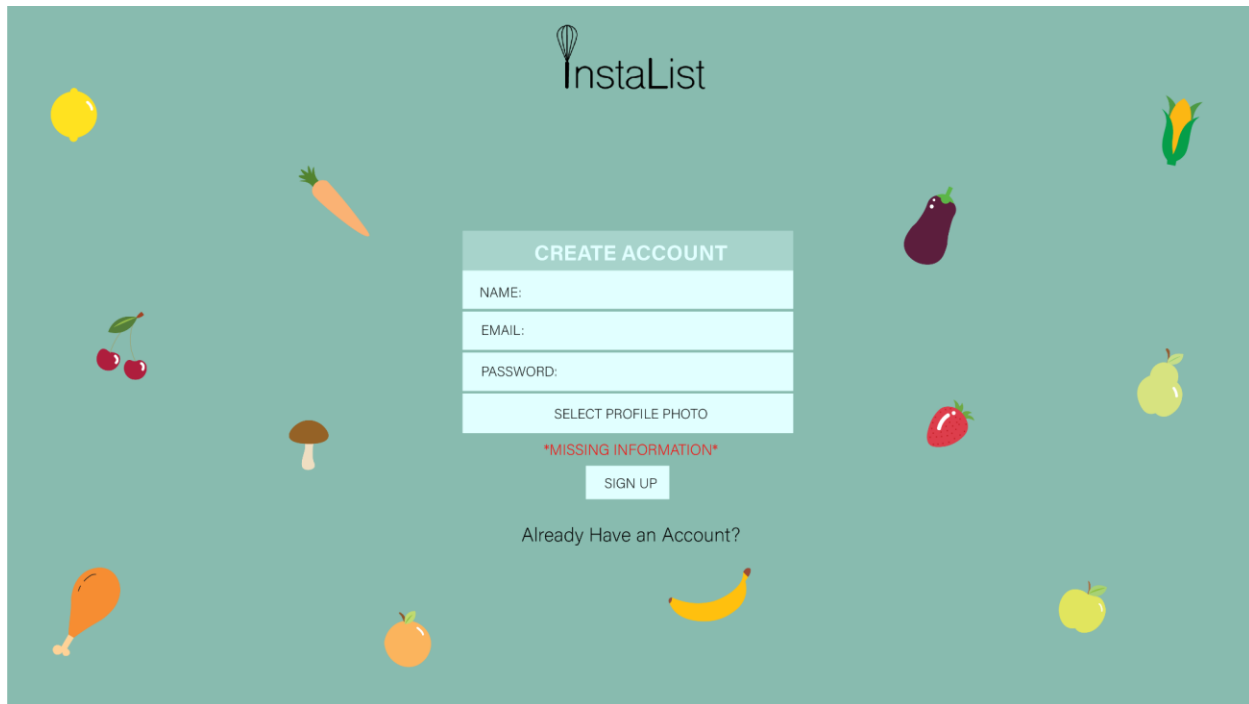

- a. The user should be able to navigate to a page in order to view their individual profile page. As the user, I want to change my profile picture, edit my password, or add my food allergies.
- b. Weight = 3

6. Help Tab

- a. If the user ever feels lost or needs to know how the website works, I should be able to navigate to a help page in order to answer any questions that I have. Such as learning how the website works, looking at FAQ's, or contacting technical support.
- b. Weight = 2

# Design:

Registration:

The registration form is centered on a teal background decorated with various food icons like lemons, carrots, mushrooms, chicken, oranges, bananas, apples, pears, strawberries, eggplants, and corn. The form itself is a light blue box with the title "CREATE ACCOUNT" in bold. It contains four input fields: "NAME:", "EMAIL:", "PASSWORD:", and "SELECT PROFILE PHOTO". Below these fields is a red error message "\*MISSING INFORMATION\*". At the bottom of the form is a "SIGN UP" button. Below the form, the text "Already Have an Account?" is displayed.

Login:

The login form is centered on the same teal background with food icons. The form is a light blue box with the title "RETURNING USER" in bold. It contains two input fields: "EMAIL:" and "PASSWORD:". Below these fields is a red error message "\*INCORRECT EMAIL OR PASSWORD\*". At the bottom of the form is a "SIGN IN" button. Below the form, the text "Make New Account | Reset Password" is displayed.
