User Acceptance Test
Copy of UAT plans for at least 3 features

For all pages, excluding the login and sign-up, it is a requirement to be logged in in order for that page to be accessible.

Contact Us Form

<u>User Story</u>: Using the *Contact Us* page, the user should successfully be able to provide feedback/message to the managers of InstaList.

<u>Test Cases</u>:
- ➢ Test Case 1: The user's input in the name, email, and message fields should be successfully recorded
- ➢ Test Case 2: The form provides the user with feedback regarding the successful recording of their input
- ➢ Test Case 3: Form submission will fail if any of the fields do not meet their required submission criteria
- ➢ Test Case 4: The form provides the user with feedback regarding the error

<u>Acceptance Criteria</u>:
1. A user cannot submit a form unless they are logged in

2. A user cannot submit a form without completing all the required fields.
   Required fields include:
      - Name
      - Email
      - Message/feedback
3. The input in the email field must specifically contain the correct formatting.
   Correct formatting includes:
      - The email input has ____@____.com included in it
4. Information from the form is stored in the *contactUs* table within our "instalist_DB" database
5. Feedback from the website will present a dark overlay that has a message reading "Your message has been recorded!"

Sign Up Form

User Story: The user should be able to successfully make a new account

Test Cases:

- ➢ Test Case 1: The user's input in the username, password, confirm password, and profile picture fields should be successfully recorded in the database
- ➢ Test Case 2: Upon successful registration, the website will allow access into InstaList home website
- ➢ Test Case 3: Account creation will fail if user does not correctly fill out the required information
- ➢ Test Case 4: The form provides the user with specific feedback regarding the specific error of failed registration
- ➢ Test Case 5: If the user already has an account, they should be able to navigate to the login page

Acceptance Criteria:
1. A user cannot submit a form without completing all the required fields.
   Required fields include:
      - Username
      - Password
      - Confirm Password
2. A user cannot submit a form if the inputs do not comply with the requirements.
   Input requirements include:
      - Username must be unique
      - Password and Confirm Password must be identical

3. Information from the form is stored in the *userDetails* table within our "instalist_DB" database
4. Successful registration will direct the user to InstaList's homepage, as well as give full access to all other pages of the website

Edit Profile

<u>User Story</u>: The user should be able to successfully edit the contents of their profile

<u>Test Cases</u>:

➢ Test Case 1: The user's input in the username, password, profile picture, and dietary restrictions should successfully be updated in the "instalist_DB" database
➢ Test Case 2: Upon successful profile update, the website will direct the user to the profile page, which displays the correct information
➢ Test Case 3: Profile edit will fail if user does not correctly fill out the information
➢ Test Case 4: The form provides the user with specific feedback regarding the specific error of failed profile edit
➢ Test Case 5: The user should be able to return to the profile page if they no longer wish to continue with the edit profile process

<u>Acceptance Criteria</u>:
1. A user cannot modify the profile page unless they are logged in
2. A user cannot submit the edit profile form if the input(s) do not comply with the requirements.
   Input requirements include:
   ● Username must be unique
3. Information from the edit profile form will be updated in the *userDetails* table within our "instalist_DB" database
